Re: **Request for Irrigated Land Use Data in the Cuyama Basin**

Cuyama Basin Landowner:

The Cuyama Basin Groundwater Sustainability Agency (CBGSA) incorporates irrigated land use data annually from local landowners and the California Department of Water Resources (DWR) to maintain an accurate dataset for water resource management in the basin.

To ensure the most accurate land use data is included, the CBGSA requests landowners submit their actual irrigated land use data for the Water Year 2025 (October 1, 2024 through September 30, 2025), and projected irrigated land use data for the subsequent October through December 2025 period using the attached form. *If data is not provided to the CBGSA, the most recent data from the DWR land use dataset will be used.*

Please submit this data **by December 26, 2025** to tblakslee@hgcpm.com, or by mail to 4900 California Ave, Tower B, Suite 210, Bakersfield CA, 93309.

The following options are available to submit this information:

1. Download and complete the bulk excel sheet (preferred method).
2. Complete the attached form or the online version for each parcel: <https://tinyurl.com/mr33s9ze>
3. Contact staff if you have an alternate format you would like to use.

An editable version of the PDF and the bulk excel sheet are provided on the CBGSA website at www.cuyamabasin.org/resources.

Please feel free to contact me at (661) 477-3385, or tblakslee@hgcpm.com if you have any questions.

Sincerely,

A handwritten signature in blue ink that reads "Taylor Blakslee".

Taylor Blakslee, Assistant Executive Director
Cuyama Basin Groundwater Sustainability Agency
